ABSTRACT

This reference book offers information about nearly 1,200 funding opportunities open to Americans interested in research, creative, professional, or related activities abroad. The directory is divided into three separate sections: a descriptive list of financial aid programs established to support research and creative activities abroad; an annotated bibliography of directories listing general financial aid programs; and a set of five indexes. The first portion describes the financial aid programs which are grouped in four chapter aimed at specific population groups: (1) high school and undergraduate students; (2) graduate students; (3) postdoctorates; and (4) professional or other individuals. Within each chapter entries appear alphabetically by program title. The information for the profiles was supplied in response to questionnaires distributed through January, 1992. The annotated bibliography of general financial aid directories lists 60 key directories published in 1985 or later that describe domestic programs and resources available for use in the United States. The directories are listed by type of program and each entry contains basic bibliographic information and an annotation specifying scope, arrangement, publication history, and special features. The directory contains five indexes, a program title index, a sponsoring organization index, an index listing programs by geographic coverage, a subject index, and a calendar index. (JB)
